

The People Will Defeat Imperialism!

A call to join the May 1st Anti-Capitalist Demonstration in Montreal

The capitalist crisis of the last few years opened up a new era of attack against the living conditions of the working class around the world. The CEOs, the bankers and bourgeois politicians launched a large offensive on many fronts:

- Layoffs and pay cuts creating massive unemployment;
- Budget cuts in social services and privatization of government owned companies;
- Increases in taxes and overall cost of living for households;
- Cuts to pension plans;
- State control by finance capital of bankrupt governments, like in Greece;
- Tighter control of immigration policies and a rise in anti-immigrant propaganda.

Everywhere the crisis is an opportunity to deepen conditions of exploitation. The prosperity of the capitalist minority directly translates to the impoverishment of the majority: workers, the unemployed, workers with no status, aboriginals, vast numbers of oppressed peoples of which women constitute the majority.

The other side of the coin is that this era is also the era of rising revolts. In Asia, the Indian and Filipino people are waging revolutionary war. In the Arab world, people are rising up against tyrannical regimes. In Afghanistan, imperialism is losing footing despite 10 years of aggression. In the West, the youth found a momentum of fighting spirit and increasingly confront the police. The First Nations are struggling against the pillaging of their territories.

The blind aggression that world powers are seeking to bail out their system will have run its course. The growing contradiction between the people and the exploiters will escalate into major clashes until the defeat of the imperialists.

Here in Montreal, all forces determined to end oppression and exploitation are joining on May 1st for an anti-capitalist offensive protest.

**Let's join together to overthrow capitalism!
Forge a unity of people's struggle all over the world!**

**Let's march together behind the anti-imperialist banner
in the May 1st anti-capitalist demonstration!**

The People Will Defeat Imperialism!
